

# JOZEF CIPA

Junior fullstack web developer

## - ABOUT ME

Hello,  
my name is **Jozef Cipa** and I am 17 years old junior **fullstack web developer**. Currently I am in third year in High School of Electrical Engineering in Presov, Slovakia. I really enjoy creating websites and stuff around this.

Currently I'm looking for **summer intern**.  
Please continue reading, if you think we could make some deal.  
Feel free to contact me for more details.

## - EDUCATION

### HIGH SCHOOL OF ELECTRICAL ENGINEERING

*2014 - present*  
*Presov, Slovakia*  
*[spse-po.sk](http://spse-po.sk)*

I study **information** and **network technologies**.  
We are learning here programming, creating web and database applications.  
We are also managing **Linux** servers and configuring **networks** with CISCO devices.  
**SCRUM** is another great thing which is practised in this school.  
This school is considered as the **best high school** in country by its ratings and reached results.

## - LANGUAGES

**SLOVAK** - native language

**ENGLISH** - currently level B1 but still improving

# - SKILLS

## BACKEND

I love this part probably a most. I use **PHP** and **MariaDB**. I love beautiful and readable code, so **Laravel** is my choice in development. These great technologies are sometimes complemented or replaced with **NodeJS** or **Python**.

## FRONTEND

I really enjoy creating frontend with using modern technologies such as **ReactJS** with **Redux**, **ES6** version of Javascript and obviously popular library **jQuery**.  
My production is facilitated by **SASS**, **Bootstrap**, and of course building tools like **Gulp** or versioning system **Git**.

## MOBILE APPS

I have some basic knowledge about mobile app development for iOS platform using latest technologies including **Swift** and **React Native**.

# - EXPERIENCE

## BART.SK S.R.O.

*July 2016 - present*

*Kosice, Slovakia*

*[bartsolutions.com](http://bartsolutions.com)*

I work here as junior fullstack web developer.

We use technologies like PHP(Zend Framework), MySQL, jQuery, XSLT and so on.

I am responsible for adding and improving functionality for existing websites.

I am creating administrations and public parts of web according to client's requirements.

I learned a lot here and I'm still learning.

# - REFERENCES

“

Jozo was working at our company within his student experience.

I was very surprised by his expertise,  
that was on level of fourth-grade of technical university.

I am glad he helps us with improving our projects  
also after finishing his student experience.

As a student he organizes his time responsibly and meet all deadlines.

”
